

Appln. No. 09/696,114  
Amendment dated December 1, 2004  
Reply to Office Action of October 5, 2004

Amendments to the Claims:

Please amend claims 124, 147 and 150 as follows. The following listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

Claims 1-123 (Cancelled).

Claim 124 (Currently Amended). A book copying system for copying a book based on electronic image data obtained through a network, comprising:

5 a data service system connected to the network and to supply electronic image data of a book through the network, the data service system having a data storage section in which image data of a plurality of different books are stored and a data managing section to manage the image data;

10 a print service station connected to the network and having a print section which comprises an input section, an image reading section to read an image of a document, and an image forming section and which is installed at a place to where a user carries a document, operates ~~a print section~~ the image reading

Appln. No. 09/696,114  
Amendment dated December 1, 2004  
Reply to Office Action of October 5, 2004

section to read an image of the document and to make a ~~print~~ copy  
15 of ~~a~~ the document and where ~~the~~ a user operates ~~an~~ the input  
section to input a print order of the user to print a copy of an  
ordered book, the print service station having ~~the input device,~~  
a print managing section to communicate with the data service  
system so as to obtain image data of the ordered book from the  
20 data storage section through the network and the print section to  
print a copy of the ordered book based on the obtained image  
data;

wherein the print service station selectively sets a  
printing condition in accordance with the print order and sets  
25 ~~the~~ a print service charge in accordance with the selected  
printing condition,

wherein after the print service station prints the image  
data, the print service station determines ~~the~~ a print service  
charge in accordance with a print result of the copy of the  
30 ordered book, and

wherein the data service system sets a data service charge  
for the image data of the ordered book, and

a calculating section connected to the network to receive  
the data service charge and the print service charge and to  
35 calculate a copy charge based on the data service charge and the

Appln. No. 09/696,114  
Amendment dated December 1, 2004  
Reply to Office Action of October 5, 2004

print service charge and to conduct a payment charging process  
for the user in accordance with the calculated copy charge.

Claim 125 (Cancelled).

Claim 126 (Previously Presented). The book copying system  
of claim 124, wherein the print service station reports a print  
result of the copy to the calculating section and the calculating  
section reduces the copy charge in accordance with the printing  
5 result of the copy.

Claim 127 (Previously Presented). The book copying system  
of claim 126, wherein the print service station comprises a copy  
result detecting section which reports the printing result.

Claim 128 (Previously Presented). The book copying system  
of claim 126, wherein the printing result includes a notice to  
indicate successful printing.

Claim 129 (Cancelled).

Appln. No. 09/696,114  
Amendment dated December 1, 2004  
Reply to Office Action of October 9, 2004

Claim 130 (Previously Presented). The book copying system of claim 124, wherein when the calculating section is provided in the print service station, the data service system transmits the data service charge through the network to the print service  
5 station so that the calculating section calculates the copy charge.

Claim 131 (Previously Presented). The book copying system of claim 124, wherein when the calculating section is provided in the data service system, the print service station transmits the print service charge through the network to the data service  
5 system so that the calculating section calculates the copy charge.

Claim 132 (Previously Presented). The book copying system of claim 131, wherein after the print service station prints the copy, the print service station transmits the print service charge through the network to the data service system so that the  
5 calculating section calculates the copy charge.

Claim 133 (Previously Presented). The book copying system of claim 124, wherein the data service system sets the data

Appln. No. 09/696,114  
Amendment dated December 1, 2004  
Reply to Office Action of October 5, 2004

service charge based on at least one of a royalty of a copyright  
on the book, a data conversion fee to convert an original book  
5 into electronic image data and a service charge to transmit the  
image data.

Claim 134 (Previously Presented). The book copying system  
of claim 133, wherein when the copyright on the ordered book is  
terminated, the data service system excludes the royalty of the  
copyright from the data service charge.

Claim 135 (Previously Presented). The book copying system  
of claim 124, wherein the print service station sets the print  
service charge based on at least one of a rental fee for  
materials and a rental fee for a printer which is used for  
5 printing the image data.

Claim 136 (Previously Presented). The book copying system  
of claim 135, wherein before the print service station prints the  
image data, the print service station estimates the copy service  
charge based on at least one of the rental fee for the materials  
5 and the rental fee for the printer which are expected to be used  
for printing the image data.

Appln. No. 09/696,114  
Amendment dated December 1, 2004  
Reply to Office Action of October 5, 2004

Claim 137 (Previously Presented). The book copying system of claim 135, wherein after the print service station printed the image data, the print service station sets the copy service charge based on at least one of the rental fee for the materials and the rental fee for the printer which were used for printing  
5 the image data.

Claim 138 (Cancelled).

Claim 139 (Previously Presented). The book copying system of claim 135, wherein the print service station comprises a plurality of printers and sets the print service charge for each of the plurality of printers.

Claim 140 (Previously Presented). The book copying system of claim 124, wherein at least one of the data service charge and the print service charge is encrypted.

Claim 141 (Previously Presented). The book copying system of claim 140, wherein at least one of the data service charge and the print service charge is provided with a digital signature encrypted with a cryptography key.

Appln. No. 09/696,114  
Amendment dated December 1, 2004  
Reply to Office Action of October 5, 2004

Claim 142 (Previously Presented). The book copying system of claim 124, wherein at least one of the data service system and the print service station comprises a data processing section to compile the image data in accordance with the print specification  
5 of the user, the print service station controls a printing condition to print the compiled image data by the print section in accordance with the print specification,

wherein the print service station sets an estimated copy charge in accordance with the print specification and indicates  
10 the estimated copy charge for the user, and

wherein when the user agrees to the estimated copy charge, the print service station sends an order signal to the data service system.

Claim 143 (Cancelled).

Claim 144 (Previously Presented). The book copying system of claim 142, wherein the data service system transmits an estimated data service charge for the image data of the ordered book to the print service station and the print service station  
5 sets the estimated copy charge based on the estimated data service charge.

Appln. No. 09/696,114  
Amendment dated December 1, 2004  
Reply to Office Action of October 5, 2004

Claim 145 (Previously Presented). The book copying system of claim 144, wherein the data service system transmits the estimated data service charge together with a period of validity and when the period of validity has expired, the data service  
5 system makes the estimated data service charge invalid.

Claim 146 (Cancelled).

Claim 147 (Currently Amended). The book copying system of claim 142, wherein the data management section of the data service system transmits job ID information to the print service station and the data storage section.

Claim 148 (Previously Presented). The book copying system of claim 147, wherein when the user agrees to an estimated copy charge and sends an order signal, the data service system transmits job ID information to the print service station.

Claim 149 (Previously Presented). The book copying system of claim 147, wherein the data storage section specifies image data and the print service station to be sent the image data on the basis of the job ID information.

Appln. No. 09/696,114  
Amendment dated December 1, 2004  
Reply to Office Action of October 5, 2004

Claim 150 (Currently Amended). The book copying system of claim 149, wherein the data storage section collates the job ID information sent to the print service station with the job ID information ~~transmitted~~ sent from the data managing section, ~~and~~ specifies the print service station having the same job ID information with the job ID information sent from the data managing section, to which and sends the image data will be sent to the print service station having the same job ID information.

Claim 151 (Previously Presented). The book copying system of claim 149, wherein the data storage section forwards the job ID information sent to the print service station to the data managing section and the data managing section collates the job ID information with the job ID information forwarded from the data storage section and specifies the print service station to which the image data will be sent.

Claim 152 (Previously Presented). The book copying system of claim 151, wherein the data managing section transmits a data storing location to the print service station in response to the order signal.

Appln. No. 09/696,114  
Amendment dated December 1, 2004  
Reply to Office Action of October 5, 2004

Claim 153 (Previously Presented). The book copying system of claim 152, wherein the print service station accesses the data storage section on the basis of the obtained data storing location and sends the print specification to the data storage  
5 section.

Claim 154 (Previously Presented). The book copying system of claim 153, wherein the data storage section includes the data processing section which compiles the image data on the basis of the print specification.

Claim 155 (Previously Presented). The book copying system of claim 153, wherein the print specification includes a print mode and the data processing section compiles a page arrangement in accordance with the print mode.

Claim 156 (Previously Presented). The book copying system of claim 155, wherein the print mode includes a page-unit print and a book-unit print.

Claim 157 (Previously Presented). The book copying system of claim 153, wherein the data storage section encrypts the image

Appln. No. 09/696,114  
Amendment dated December 1, 2004  
Reply to Office Action of October 5, 2004

data and the print service station decrypts the encrypted data and conducts the printing on the basis of the decrypted data.

Claim 158 (Previously Presented). The book copying system of claim 157, wherein the print service station conducts a trial printing before the printing.

Claim 159 (Previously Presented). The book copying system of claim 153, wherein the print managing section of the print service station requests the print section to conduct the printing after obtaining the image data from the data storing  
5 location.

Claim 160 (Previously Presented). The book copying system of claim 159, wherein the print service station reports a print result of the copy and the book copying system adjusts the copy charge in accordance with the printing result of the copy.

Claim 161 (Previously Presented). The book copying system of claim 160, wherein the book copying system conducts a payment charging processing on the basis of the printing result.

Appln. No. 09/696,114  
Amendment dated December 1, 2004  
Reply to Office Action of October 5, 2004

Claim 162 (Previously Presented). The book copying system of claim 160, wherein at least one of the estimated copy charge and the printing result is provided with a digital signature by a public key cryptograph method.

Claim 163 (Previously Presented). The book copying system of claim 142, wherein when the print service station requests a log-in for the data service system, the data service system certifies the request of log-in of the print service station.

Claim 164 (Previously Presented). The book copying system of claim 163, wherein the print service station is provided with a cryptograph key for each client and when the print service station accesses the data service system, the print service  
5 station makes a digital signature encrypted by the cryptograph key.

Claim 165 (Previously Presented). The book copying system of claim 163, wherein when the print service station accesses the service system, the print service station makes a digital signature by a public key cryptograph method.

Appln. No. 09/696,114  
Amendment dated December 1, 2004  
Reply to Office Action of October 5, 2004

Claim 166 (Previously Presented). The book copying system of claim 142, wherein when the calculating section is provided in the print service station, the data service system transmits the data service charge through the network to the print service  
5 station so that the calculating section calculates the copy charge.

Claim 167 (Previously Presented). The book copying system of claim 142, wherein when the calculating section is provided in the data service system, the print service station transmits the print service charge through the network to the data service  
5 system so that the calculating section calculates the copy charge.
